

its nice to come home from work eat dinner and enjoy an evening with my family. not getting up 10 times to answer unwanted calls from telemarketers. If they were knocking on my door i can have them removed by the local police. we need the nj do not call. once i tell these people i am on the list they never call again. keep the nj do not call going. with all the taxes and surcharges we have on our phone bill its about time a state has done something for the people.
